Experienced Data Analyst skilled in SQL, Tableau, and Excel. Proficient in data warehousing, validation, and business analysis, with expertise in report creation. I am seeking a challenging role related to data and am passionate about fostering a data-driven decision culture.

Skills

- Microsoft Office Suite (Word, Advance Excel, PowerPoint)
- Power BI
- Tableau
- Python | R | SQL
- Data Visualization | Data Mining & Analytics

Work History

Data Analyst (April 2024 to June 2024)

Project 1 – Banking Analytics

- Used SQL, Tableau, Power BI, Excel tools to Extract, Transform, and Load (ETL) data, which sample data were collected from the source systems to data warehouse designed to analyze data.
- In this project, we understood the overall distribution of key variables such as loan amounts, interest rates, customer demographics, and loan terms. Statistics, visualizations, and data insights provides an initial understanding of the datasets.
- Customer demographics and loan characteristics can be utilized to segment the customer base into distinct groups.
- Identifying common characteristics and behaviors within these segments help to tailor loan products and marketing strategies. The project's analysis of loan performance over time reveals patterns in loan delinquency and repayment behavior.
- Identifying high-risk and low-risk customer profiles, assessing the historical default rates, and creating strategies to mitigate risk by adjusting lending criteria or interest rates.
- Maintain and update dashboard datasets in Excel, Tableau and Power BI.

Soft Skills:

- Communication Skills
- Adaptability
- Time Management
- Creativity
- Multitasking

Education

- **Bachelor of Commerce (2018-2020)**
- DR. Babasaheb Ambedkar Marathwada university.
- Chh.Sambhaji Nagar
