Seeking a Software Test Engineer role to apply my skills in API automation, Selenium, and Java-based testing to deliver reliable and high-quality software solutions.

Technical Skills

Testing Tools: Selenium WebDriver, JUnit, Cucumber (BDD), Postman, JIRA, Manual Testing, Regression Testing, Smoke Testing,

Build & CI/CD: Maven, Jenkins, Docker, Git/Github

Programming & Database: Java, SQL

Frameworks: Cucumber BDD

Projects

FinSys Web Application Testing

Java, Selenium WebDriver, Cucumber BDD, JUnit, Maven

- Designed and developed a Maven-based Cucumber BDD automation framework from scratch.
- Implemented Page Object Model (POM) with dedicated page classes for each module.
- Authored 10 Gherkin feature files covering smoke scenarios for Login, Company CRUD, and financial modules.
- Developed Step Definition classes mapping Gherkin steps to Selenium WebDriver actions.
- Handled complex UI scenarios including iframe switching, DataTable inputs, and alert handling.
- Integrated WebDriverManager and implemented Singleton DriverManager for consistent session handling.

Learning Management System (LMS) API Testing

Java, Maven, Rest-Assured, Postman, JUnit

- Designed a BDD-based REST API automation framework using Java, Cucumber, and Rest-Assured.
- Built a generic REST utility to handle POST, GET, PUT, and DELETE requests.
- Implemented dynamic data handling for tokens, user IDs, and runtime values.
- Managed environment-specific configurations for SIT and UAT using external property files.
- Configured Cucumber Hooks for test setup, cleanup, and reliable execution.
- Integrated Extent Reports for detailed HTML execution reports.
- Validated API responses, status codes, and negative scenarios using JUnit assertions.
